

Update

Bugs

- When adding product, prompts about date of availability
- When adding product, for the price, it requires \$1.3 instead of giving the ability to enter \$1.25
- Available Date should be saved throughout, move to visible as part of the header (fixed header)

- When editing product as a Buyer, unable to edit, once inside the order details page, Buyer should be able to remove product or edit quantity.

New Features

- **Feature:** Ensure Pages are Mobile Friendly, and Page should load gracefully on a smaller screen.

Upload Product Page

- **Feature:** Drag photo to upload. Ability to drag photo to the upload box to upload the photo, instead of selecting from the drive, or ability to upload by url (option below)
- **Feature:** Upload by URL. Ability to paste a url in the field, and when upload is clicked, will upload the photo.
- **Feature:** After Adding product, should have a link to add another product
- **Product Model, Add New Field:** Increments (customers must buy in set increments, ie, 25 stems, if someone selects 1 - 24 stems, it defaults to 25 - the minimum increment). Seller can set to whatever number they choose, typically can be 25/50/100/200.
- **Product Model, Add New Field:** Color to display in colour blocks, click to select colour by clicking blocks (circle). Seller will click on colour block that their flower matches, and on the search side, user can select colours to filter results by.

- **Product Model, New Field:** Tags, ability to tag product, such as: Pink, Cloony, Clooney, Ranunculus, Add Search ability to find products by Tags. Allow user to enter tags in a field, separated by comma. ie: Pink, Cloony, Ranunculus. In search we will be able to pull results by these tags as well.
- **Feature:** Today Quick Populate. Next to the dropdown for Date, have "Today" as a link, when clicked, pre-populates the dropdown with Today's Date. Prefer this to defaulting to today's date, just in case the buyer wants to upload something from the future.
- **Product Model, Add New Field:** Product Categories (Dropdown):

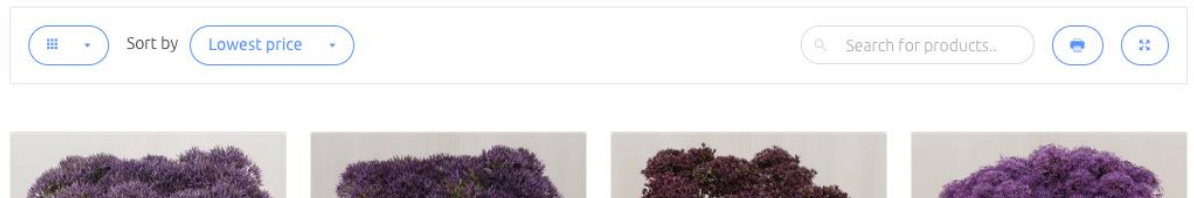

Allium
 Alstroemeria
 Amaryllis
 Anemone
 Anthurium
 Antirrhinum / Matthiola
 Asclepias
 Bouquets
 Calendula
 Calla Lilies / Zantedeschia
 Carnations / Spray Carnations
 Chrysanthemums
 Orchids: Cymbidium / Phalaenopsis / Vanda
 Decorative fruits
 Dianthus Barbatus
 Eryngium Thistle
 Floral Foam
 Freesia
 Gerbera / Germini
 Gypsy Grass / Solidaster
 Heliconia / Strelitzia
 Hydrangea
 Hypericum
 Leaf, Other
 Limonium
 Leucospermum / Protea / Brunia
 Ornithogalum
 Other
 Peony
 Ranunculus
 Rose
 Rose Ecuador
 Rose Spray
 Shrub / Wood

Syringa / Viburnum
Veronica
Waxflower
Wreaths

Display Product / Search Results

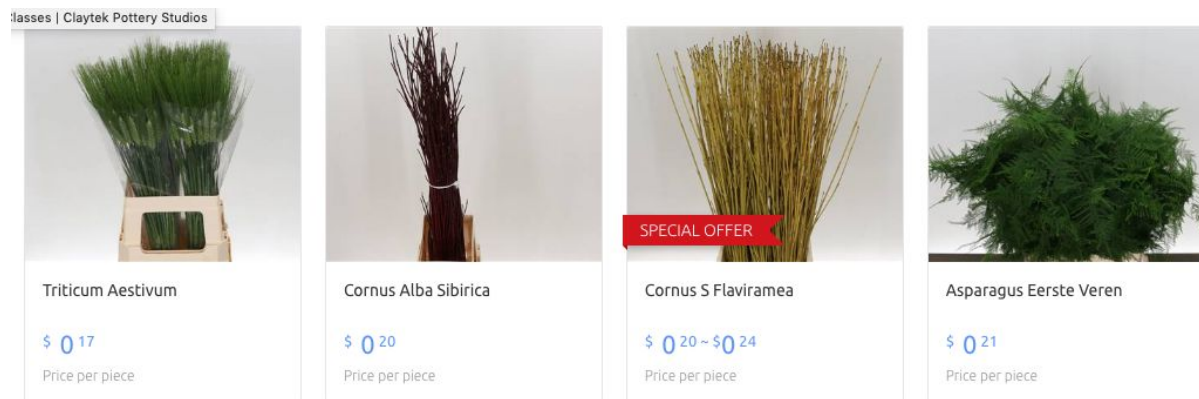

- **Feature:** Search/Filter Bar: Search within results

There are **10** products within **Flowers**

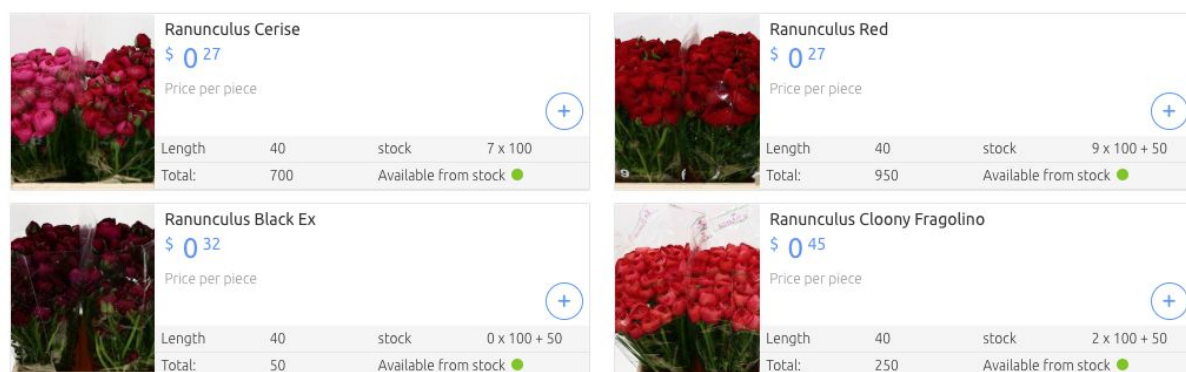

- **Feature:** Display, Ability to change the way product results are displayed. By 4 images, by Image (left) and description (right), by 6 images across.

- **Feature:** Display by 4 images (columns) across

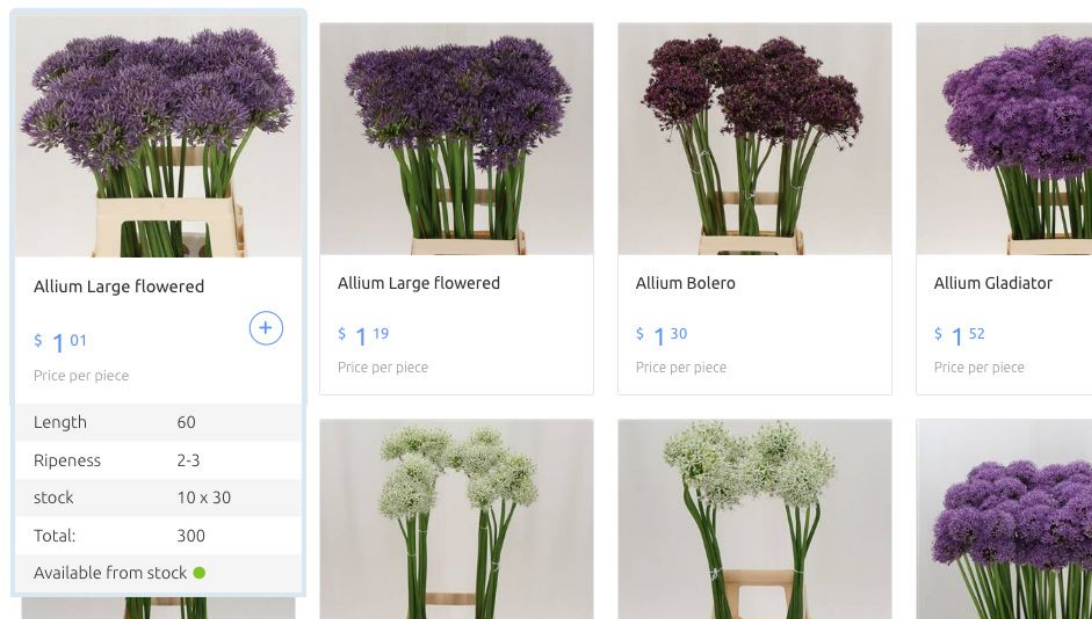

- Display by Image and description to the right

- **Feature:** Display by 6 across

- **Feature:** On Mouseover (Show details for the product you mouseover on)

- **Feature:** Display Sorting / Filtering Abilities

- Sort by price per stem (highest/lowest up/down)
- Sort by description (alpha up/down)
- Sort by name (alpha up/down)
- Filter by length height / length
- Filter by origin
- Filter by category

Product Display (From Search Results/Product Listings)

- **Product Model, Add New Field:** Feature. Special, Low Price, Limited, Exclusive tags, that can be selected, and would display as a overlay if set.

- **Product Model, Add New Field:** Grower. Ability for the seller to set a grower field. Grower can be different from the seller, something that the seller carries or sells. In the event that the seller is a farm, they would just populate the seller with their own name.

Import / Export

- **Feature:** Add Manage Products Section (<http://app.floweret.ca/public/my-products>): Ability to export all product and import via CSV / Spreadsheet. Image provided by URL. Initial spreadsheet can be created from updated values and create an export to .csv button from that.

Order Product

- **Fix:** Order Confirmation, when ordering should show price of product and quantity
- **Fix:** Upcoming Orders should just show delivery date, status, Seller, total price and view/edit
- **Fix:** Past Orders should just show delivery date, status, Seller, total price and view
- **Fix:** Ordering from product page, should stay on same page, it should just pop up or show a status message on the page that the product has been added, could be a simple css prompt under the product, to show that product has been added.

Buyer Side: Order Details Page

- **Feature:** Add Order Details Page, Should show a listing of all the products from selected order, and display images of flowers ordered w/ line item
- **Feature:** Add Florist Order Details Page, Should show a listing of all the products from selected order with images, but not including pricing or final pricing. This page can be passed off to their designers for planning
- **Order Model, Add New Field: PO Name (Purchase Order Name)**, ability for Buyer to set a reference name of what this order is for, for easier product management
- **Order Model, Add New Field: Delivery Option**, ability for Buyer to select delivery, or pick up. Delivery to Address (Dropdown ability?)
- **Order Model, Add New Field: Payment Option**, ability for Seller to set whether payment is online by "credit card" or "invoice" Seller charges through another outside system
- **Feature: Addresses**, ability for buyer to add addresses, similar to when you're ordering from Amazon, you can create a list of addresses that you'd like to deliver to.

Sellers Side: Order Details Page

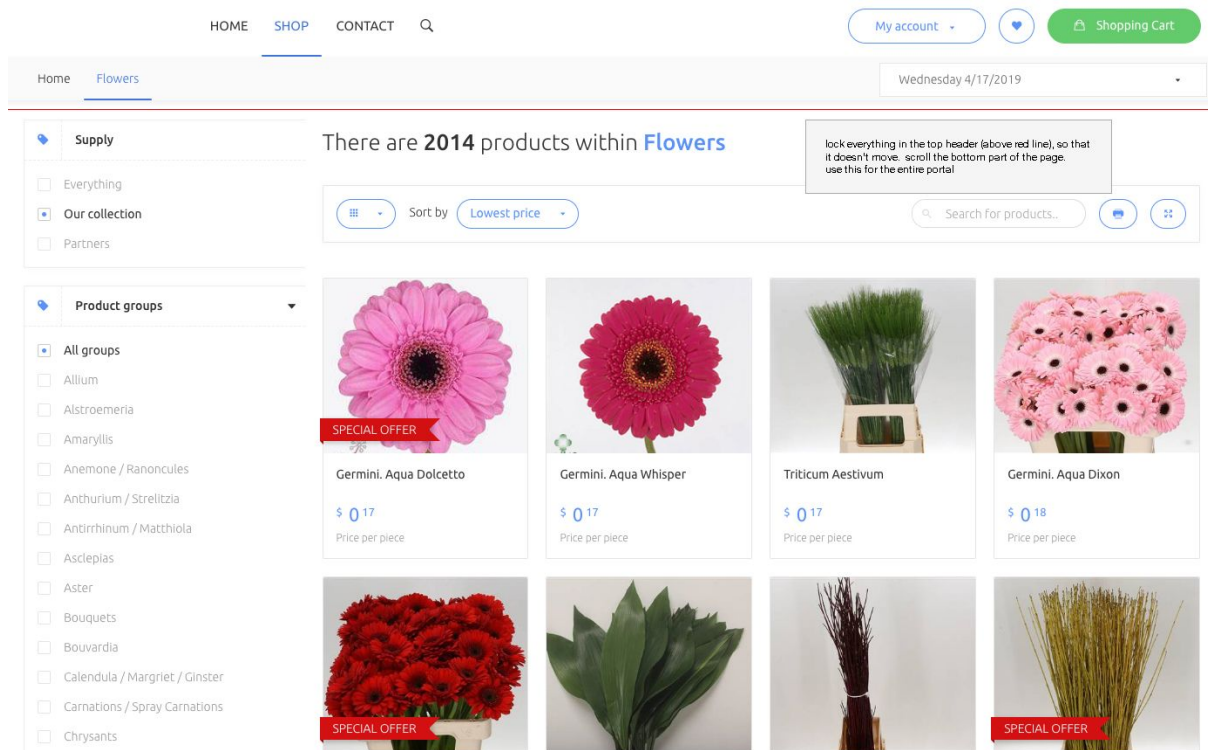

- **Feature:** Add Order Details Page, Should show a listing of all the products (with images) from selected Buyer Order
- **Feature:** Edit Product Status (each line), Should show a listing of all the products ordered by selected buyer. Seller should be able to change status for each product to say, "Confirmed", "Not Available", "Submitted"
- **Feature:** Edit Order Status, Seller should be able to modify status of full order

My Account

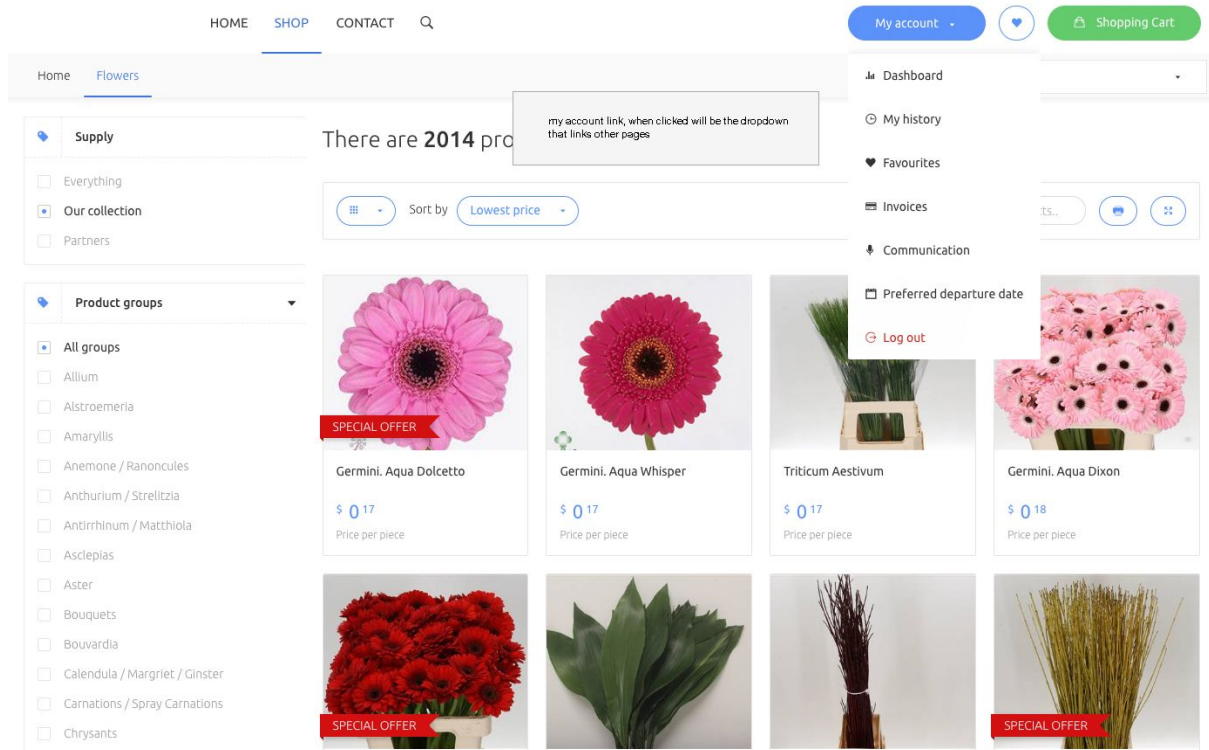

- **Feature:** Add Communications Tab, Ability to allow customer to setup emails to be notified for certain reasons. General Notifications, Order Confirmation, Shipment Notification, Invoices. When order is confirmed by Seller, should send an email notifying buyer that order number has been confirmed, and send a summary of the order
- **Feature:** Add History Page, Show Past Orders on this page
- **Feature:** Add Invoices Tab. When Orders have been confirmed, Invoices are created
 - **Feature:** Add Outstanding Invoices/Payments
 - **Feature:** Add Upcoming Invoices/Payments
